

**SCOTTISH
COCHLEAR IMPLANT
PROGRAMME**

**Crescent
of Sound**

Sometimes I have to go to Crosshouse hospital to get my ears checked.

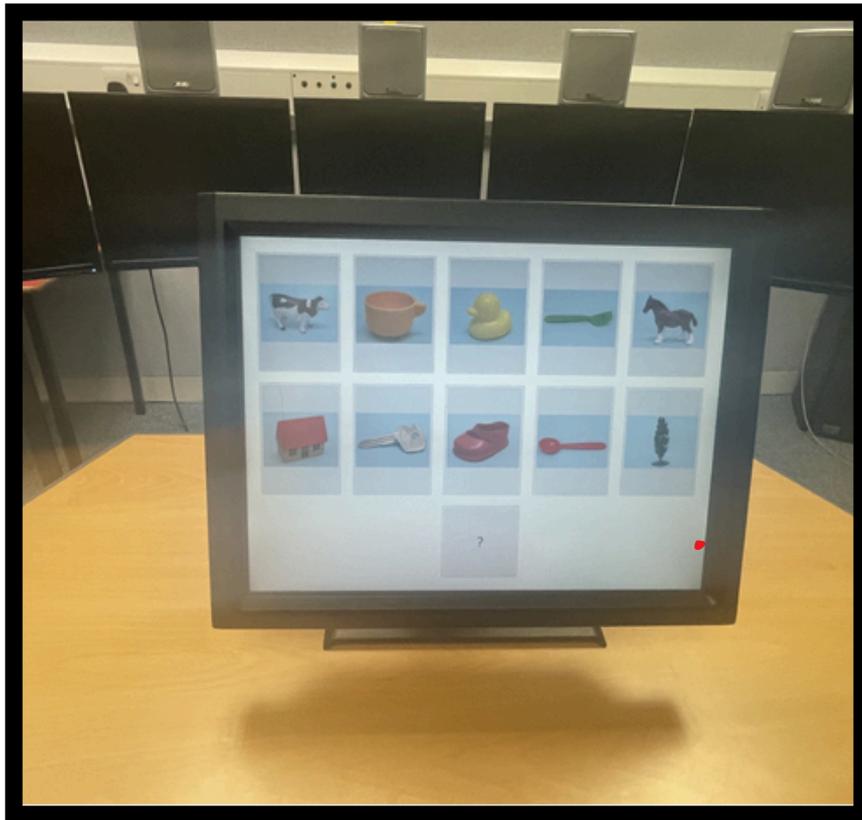

My ears help me to listen
and understand. They need
to work properly.

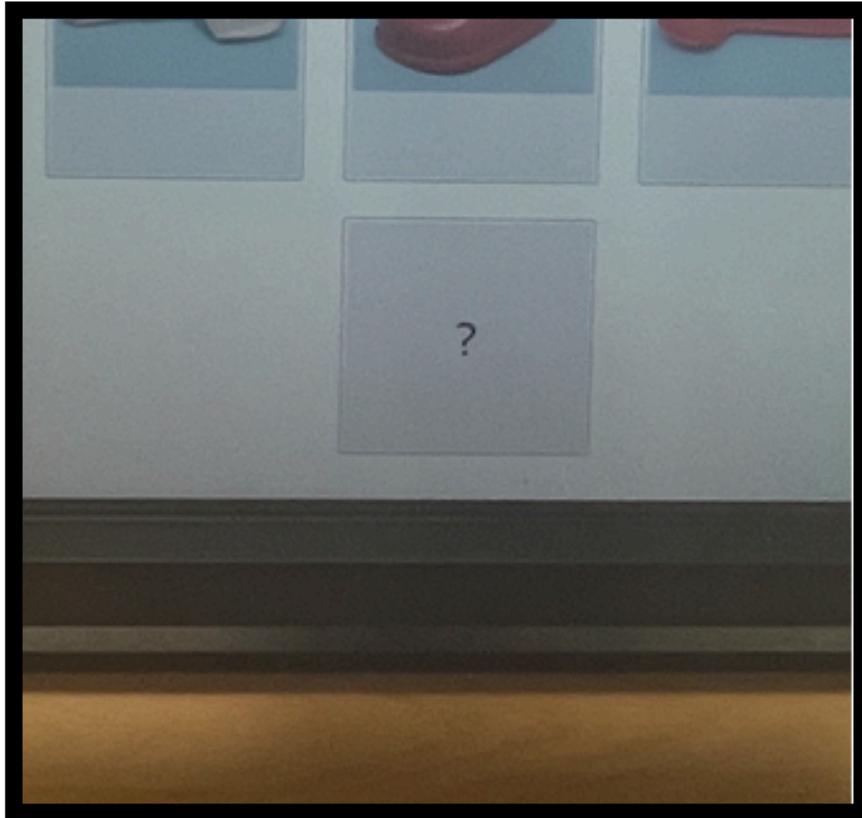

I can play listening games
on the computer.

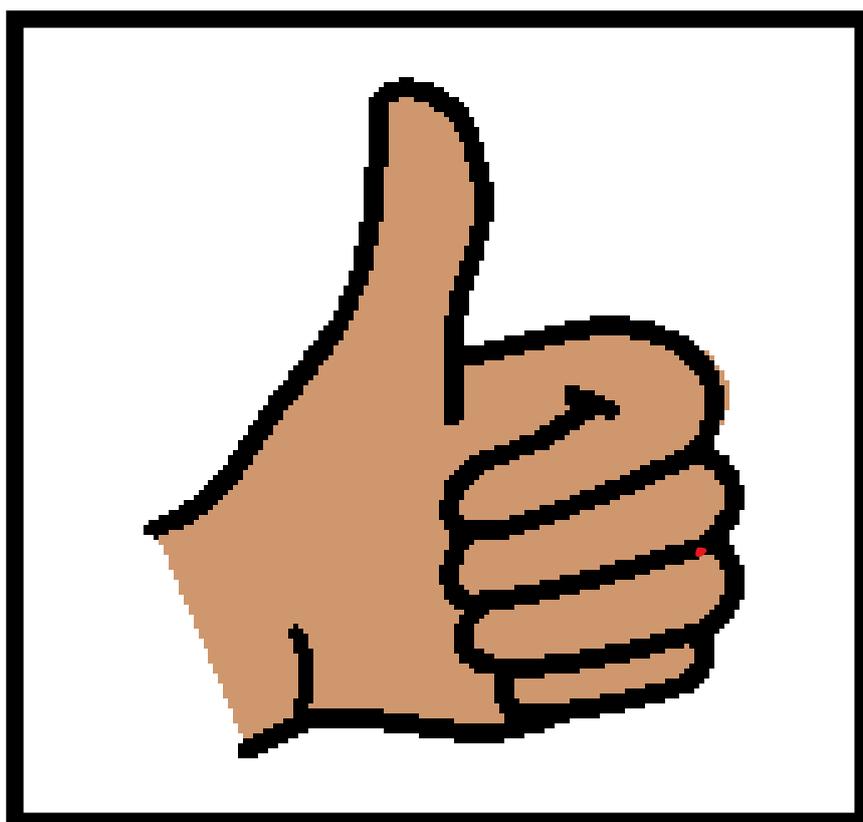

I will sit on the red chair
and listen to the speaker
with the gold star on top.

I will listen to the computer say things like, 'Point to the duck.' Then I will touch the duck on the screen.

If I don't hear anything, I can press the question mark and listen again.

I will keep listening until I'm
told to stop. Then I can go
home.
